

# Advanced Imaging Nanobiotechnology (AINBT)

## 26<sup>th</sup> Jan 2012, Alpbach congress center

The workshop highlights development of emerging advanced imaging modalities based on bionanotechnology as powerful tools for the development of pharmaceutical and targeting delivery agents for *in vivo* and *in vitro* clinical applications. Novel newly developed imaging techniques, nanomaterials and surgical tools based on nanotechnology will be presented. AINBT is organized in conjunction with Eurotransplant Winter Meeting joining leading experts in medicine and clinical research

### TOPICS:

Pre-clinical and clinical Imaging *in vivo*  
Imaging Technology and Instrumentation  
Novel nanomaterials products and tools  
Nano-based implants and related healthcare technology.

### Highlights:

Special focus on emerging imaging technologies  
Coverage of basic biomedical and clinical imaging science in addition to pre-clinical, and translational imaging technology  
New innovation platform for industrial and clinical research

Participation deadline 20<sup>th</sup>, Jan 2012. Registration fee ( 50 EUR )

\* Awards will be offered for highlighted presentations.
